

Custom-built house offers the airiness of a contemporary home with touches reminiscent of an English country cottage. Enjoy the outdoors on the two decks & screened porch. The huge great room with stack stone fireplace & cathedral ceiling is at the heart of the house, which features 3 bedrooms, including a gorgeous master suite, eat-in kitchen, studio that could be family room, full walkout basement and too many architectural details to mention. This one must be seen. Only be sure to set aside enough time because there's an incredible amount to take in. Call Teresa to schedule an appointment.
